The school psychologist has attested to normal intelligence and visual tests confirm perfect eyesight? An aging male baby boomer looking at 60 encounters very specific psychological and physical changes. The impact of these changes can be felt in relationship to others and in how a man sees himself in his world. Does he continue to fit in? In particular, how a man adapts to being in his 60s is an indicator of how he feels about living the rest of his life. Dr. Schwalbe knows from personal experience, as well as from his patients, the challenges produced by anxiety and depression in dealing with aging in a youth-oriented society. He looks at competition in the gym, sports field, financial and business arena, the political world to the social and sexual world and urges men to adapt to the outside forces. The key is in the expectations and how to recognize and plan for them. Most importantly, this book is directed to the aging male baby boomer (and to those who love him, know him, or live with him).
